**Practical Spreadsheet Risk Modeling for Management** Dale Lehman, Huybert Groenendaal, Greg Nolder

Risk analytics is developing rapidly, and analysts in the field need material that is theoretically sound as well as practical and straightforward. A one-stop resource for quantitative risk analysis, **Practical Spreadsheet Risk Modeling for Management** dispenses with the use of complex mathematics, concentrating on how powerful techniques and methods can be used correctly within a spreadsheet-based environment.

## Highlights

- Covers important topics for modern risk analysis, such as frequency-severity modeling and modeling of expert opinion
- Keeps mathematics to a minimum while covering fairly advanced topics through the use of powerful software tools
- Contains an unusually diverse selection of topics, including explicit treatment of frequency-severity modeling, copulas, parameter and model uncertainty, volatility modeling in time series, Markov chains, Bayesian modeling, stochastic dominance, and extended treatment of modeling expert opinion
- End-of-chapter exercises span eight application areas illustrating the broad application of risk analysis tools with the use of data from real-world examples and case studies

This book is written for anyone interested in conducting applied risk analysis in business, engineering, environmental planning, public policy, medicine, or virtually any field amenable to spreadsheet modeling. The authors provide practical case studies along with detailed instruction and illustration of the features of ModelRisk®, the most advanced risk modeling spreadsheet software currently available. If you intend to use spreadsheets for decision-supporting analysis, rather than merely as placeholders for numbers, then this is the resource for you.

### **From reader reviews:**

#### **Olive Wilson:**

People live in this new time of lifestyle always try to and must have the spare time or they will get lot of stress from both day to day life and work. So , once we ask do people have time, we will say absolutely sure. People is human not only a robot. Then we consult again, what kind of activity have you got when the spare time coming to you of course your answer will certainly unlimited right. Then do you ever try this one, reading guides. It can be your alternative inside spending your spare time, often the book you have read is definitely Practical Spreadsheet Risk Modeling for Management.

#### **Lori Parker:**

Are you kind of busy person, only have 10 or perhaps 15 minute in your moment to upgrading your mind talent or thinking skill possibly analytical thinking? Then you are receiving problem with the book when compared with can satisfy your short period of time to read it because this all time you only find book that need more time to be study. Practical Spreadsheet Risk Modeling for Management can be your answer since it can be read by an individual who have those short free time problems.

#### **Katherine Khan:**

As we know that book is very important thing to add our information for everything. By a book we can know everything we would like. A book is a list of written, printed, illustrated as well as blank sheet. Every year seemed to be exactly added. This e-book Practical Spreadsheet Risk Modeling for Management was filled with regards to science. Spend your extra time to add your knowledge about your technology competence. Some people has various feel when they reading any book. If you know how big benefit from a book, you can feel enjoy to read a book. In the modern era like now, many ways to get book that you just wanted.

#### **Larry Pulido:**

Reading a e-book make you to get more knowledge from it. You can take knowledge and information originating from a book. Book is published or printed or created from each source that will filled update of news. Within this modern era like today, many ways to get information are available for anyone. From media social similar to newspaper, magazines, science reserve, encyclopedia, reference book, story and comic. You can add your understanding by that book. Are you hip to spend your spare time to spread out your book? Or just searching for the Practical Spreadsheet Risk Modeling for Management when you needed it?
