**Statistical Computation for Environmental Sciences in R: Lab Manual for Models for Ecological Data (Lab Manual)** James S. Clark

The environmental sciences are undergoing a revolution in the use of models and data. Facing ecological data sets of unprecedented size and complexity, environmental scientists are struggling to understand and exploit powerful new statistical tools for making sense of ecological processes.

In *Models for Ecological Data*, James Clark introduces ecologists to these modern methods in modeling and computation. Assuming only basic courses in calculus and statistics, the text introduces readers to basic maximum likelihood and then works up to more advanced topics in Bayesian modeling and computation. Clark covers both classical statistical approaches and powerful new computational tools and describes how complexity can motivate a shift from classical to Bayesian methods. Through an available lab manual, the book introduces readers to the practical work of data modeling and computation in the language R. Based on a successful course at Duke University and National Science Foundation-funded institutes on hierarchical modeling, *Models for Ecological Data* will enable ecologists and other environmental scientists to develop useful models that make sense of ecological data.

- Consistent treatment from classical to modern Bayes
- Underlying distribution theory to algorithm development
- Many examples and applications
- Does not assume statistical background
- Extensive supporting appendixes
- Accompanying lab manual in R

### **From reader reviews:**

#### **Jose Brummitt:**

In this 21st centuries, people become competitive in every way. By being competitive right now, people have do something to make these individuals survives, being in the middle of the crowded place and notice by surrounding. One thing that occasionally many people have underestimated it for a while is reading. Yep, by reading a e-book your ability to survive raise then having chance to stand than other is high. To suit your needs who want to start reading a new book, we give you this Statistical Computation for Environmental Sciences in R: Lab Manual for Models for Ecological Data (Lab Manual) book as beginner and daily reading guide. Why, because this book is more than just a book.

#### **Lucy Fletcher:**

The experience that you get from Statistical Computation for Environmental Sciences in R: Lab Manual for Models for Ecological Data (Lab Manual) may be the more deep you excavating the information that hide inside words the more you get interested in reading it. It does not mean that this book is hard to know but Statistical Computation for Environmental Sciences in R: Lab Manual for Models for Ecological Data (Lab Manual) giving you excitement feeling of reading. The article author conveys their point in selected way that can be understood simply by anyone who read that because the author of this publication is well-known enough. That book also makes your own vocabulary increase well. So it is easy to understand then can go along with you, both in printed or e-book style are available. We recommend you for having this particular Statistical Computation for Environmental Sciences in R: Lab Manual for Models for Ecological Data (Lab Manual) instantly.

#### **Dora Gourley:**

This Statistical Computation for Environmental Sciences in R: Lab Manual for Models for Ecological Data (Lab Manual) are generally reliable for you who want to certainly be a successful person, why. The reason of this Statistical Computation for Environmental Sciences in R: Lab Manual for Models for Ecological Data (Lab Manual) can be one of many great books you must have is actually giving you more than just simple reading food but feed an individual with information that maybe will shock your prior knowledge. This book will be handy, you can bring it everywhere and whenever your conditions both in e-book and printed versions. Beside that this Statistical Computation for Environmental Sciences in R: Lab Manual for Models for Ecological Data (Lab Manual) giving you an enormous of experience like rich vocabulary, giving you demo of critical thinking that could it useful in your day activity. So , let's have it and revel in reading.

#### **Martin Herrin:**

Would you one of the book lovers? If yes, do you ever feeling doubt when you find yourself in the book store? Try to pick one book that you find out the inside because don't assess book by its include may doesn't work is difficult job because you are afraid that the inside maybe not as fantastic as in the outside appearance

likes. Maybe you answer is usually Statistical Computation for Environmental Sciences in R: Lab Manual for Models for Ecological Data (Lab Manual) why because the fantastic cover that make you consider about the content will not disappoint anyone. The inside or content is usually fantastic as the outside as well as cover. Your reading 6th sense will directly assist you to pick up this book.
