Surviving Encephalitis: into and out of Hell DC, Dr. Dan L. Macumber

Waking up in an unfamiliar place, with having no memory of how you got there, can be scary to say the least. However, when it is in the critical care unit of a major trauma center, it can be downright frightening. That is what happened to Dr. Dan L. Macumber in June of 1998. It was also a turning point in his life that he never saw coming. He was told that he had survived viral encephalitis from a tick bite and had been in a coma for the past 2 weeks. Following a near death experience while in the hospital, he found that he was forever changed in ways that one can only imagine. Dr. Dan realized that he now had psychic abilities not present from before being sick. These abilities continued to show themselves and to develop over the years to come. He discovered, with guidance from psychic friends, that he was channeling information from the Lord. The Lord, the channeling and help from other health care providers helped Dr. Dan to heal himself. It also helped him to develop a new health care format, to help others to help themselves. Despite having a background in health care, Dr. Dan hadn't yet finished his DC degree. After a year of being out of the hospital, he felt that he was ready to return to chiropractic school. In doing so, he faced many new challenges and obstacles in his path. These included; from being on his own again after being sick, to being in an intense graduate program, to dealing with whatever else life presented. He finished his graduate degree under unusual circumstances and returned home to start up his own chiropractic practice. In the mix of it all while applying his new health care format, Dr. Dan was able to deal with and to resolve a reawakening of a prior health issue of drop attacks. In addition, he resolved some other health related conditions that surfaced, as well as channeled how to handle conditions totally foreign to him, but experience by others.
