- ASD Learning Made Fun & Easy Series

- Science and research shows children with Autism Spectrum Disorder benefit greatly from using visual methods to learn number, color, and math concepts. Giving fewer choices helps the child to learn more easily. The more choices given, the more confusion an ASD child can have. The goal of this book is to keep everything simple so their learning can be easier to grasp, and thereby, make learning more enjoyable and fun for them! That is why each book only focuses on two colors, and two shapes, while integrating math.

The focus of this book is:

#1. Colors: Blue & Red

#2. Shapes: Squares & Circles

#3. Math: Addition

For best results, this book is meant to be used for one week. The following week a different book in this series should be used. Do not mix and match books within the week. You can also use this book for two weeks, or as many weeks as needed until the concepts are learned and grasped. There is no need to rush to the next book in the series. Again, the idea of this series is not to overwhelm the child with too much information. Moving to the next book too quickly can confuse the child. Wait until they understand what is in this book.

I was stirred to make this book by all the incredible mothers and fathers of ASD kids who are always in search of fun learning tools for their children at an affordable price! Their love and dedication to their beautiful children inspires me. This book is also dedicated to all the amazing, gifted, and talented ASD kids out there! We believe in you, and love you! Never forget that!

I would like to thank you for downloading this book! I look forward to sharing many new future books with you and your family! Follow me on Twitter @IsedlePub for current updates!
