This chapter details what is involved when tiling the floor part of the shower. The steps involved include; framing the box, spreading-out the rubber membrane, attaching the membrane, cutting-out the drain holes, attaching the drain plate, screwing in the drain, creating a mixture of concrete, pouring the mixture and giving the mixture time-allowance to cure. The steps have been discussed in detail as follows: 1. Framing the Box. A two by four lumber can be used in case it is required when you are framing the box. This will actually serve as the concrete-pour form. Always consider checking correct depths of concrete with your local building codes. This should incorporate the thickness and depths of the rubber membrane. Prior to starting the process of installing the concrete, you should consider the assistance of a plumber, for the purpose of roughing the drain of the shower..."
