MANUAL DE SOPORTE VITAL AVANZADO EN EL PACIENTE ADULTO Y PEDIÁTRICO J.

Álvarez López, A. Barba Chacón

Este manual incluye todos los aspectos del soporte vital avanzado sin necesidad de tener que hacerse con varias obras diferentes para una comprensión amplia de la materia. Comprende el soporte vital avanzado para el adulto, el paciente pediátrico y neonatal; junto al manejo de las técnicas que se deben conocer y aplicar. Una parte innovadora es que, además de las maniobras de SVA, abarca otras materias necesarias como electrocardiografía, ventilación mecánica, farmacología, manejo del shock o fisiología, entre otras. La mayoría de los autores son Profesores de diferentes Facultades de Medicina y Enfermería, y muchos son instructores internacionales de SVA tanto de la American Heart Association, como del European Resuscitation Council, por lo que los contenidos estarán actualizados con las últimas recomendaciones de ILCOR. También participan otros profesionales dedicados a la práctica clínica, pero todos los autores poseen experiencia ampliamente demostrable en el mundo de las urgencias y cuidados críticos ya que desempeñan su función asistencial día a día en Servicios de Urgencias Hospitalarias, Servicios de Urgencias Prehospitalarias y Unidades de Cuidados Intensivos.
