## General Topology: Chapters 5-10 (Ettore Majorana International Science) N. Bourbaki

This is the softcover reprint of the 1974 English translation of the later chapters of Bourbaki's *Topologie Generale*. Initial chapters study subgroups and quotients of  $\mathbb{R}$ , real vector spaces and projective spaces, and additive groups  $\mathbb{R}^n$ . Analogous properties are then studied for complex numbers. Later chapters illustrate the use of real numbers in general topology and discuss various topologies of function spaces and approximation of functions.
