Ocean Biogeochemical Dynamics

Jorge L. Sarmiento

Ocean Biogeochemical Dynamics Jorge L. Sarmiento

Ocean Biogeochemical Dynamics provides a broad theoretical framework upon which graduate students and upper-level undergraduates can formulate an understanding of the processes that control the mean concentration and distribution of biologically utilized elements and compounds in the ocean. Though it is written as a textbook, it will also be of interest to more advanced scientists as a wide-ranging synthesis of our present understanding of ocean biogeochemical processes.

The first two chapters of the book provide an introductory overview of biogeochemical and physical oceanography. The next four chapters concentrate on processes at the air-sea interface, the production of organic matter in the upper ocean, the remineralization of organic matter in the water column, and the processing of organic matter in the sediments. The focus of these chapters is on analyzing the cycles of organic carbon, oxygen, and nutrients.

The next three chapters round out the authors' coverage of ocean biogeochemical cycles with discussions of silica, dissolved inorganic carbon and alkalinity, and CaCO_3 . The final chapter discusses applications of ocean biogeochemistry to our understanding of the role of the ocean carbon cycle in interannual to decadal variability, paleoclimatology, and the anthropogenic carbon budget. The problem sets included at the end of each chapter encourage students to ask critical questions in this exciting new field. While much of the approach is mathematical, the math is at a level that should be accessible to students with a year or two of college level mathematics and/or physics.

From reader reviews:

Serina Horne:

Nowadays reading books become more and more than want or need but also become a life style. This reading addiction give you lot of advantages. The huge benefits you got of course the knowledge the actual information inside the book this improve your knowledge and information. The data you get based on what kind of publication you read, if you want attract knowledge just go with education books but if you want experience happy read one using theme for entertaining for example comic or novel. The particular Ocean Biogeochemical Dynamics is kind of publication which is giving the reader unforeseen experience.

Gene Kirkland:

In this age globalization it is important to someone to get information. The information will make a professional understand the condition of the world. The health of the world makes the information much easier to share. You can find a lot of references to get information example: internet, paper, book, and soon. You can see that now, a lot of publisher that print many kinds of book. Typically the book that recommended to you is Ocean Biogeochemical Dynamics this e-book consist a lot of the information of the condition of this world now. This specific book was represented how can the world has grown up. The words styles that writer make usage of to explain it is easy to understand. The actual writer made some investigation when he makes this book. That's why this book suitable all of you.

Cornelius Ryerson:

A lot of guide has printed but it differs from the others. You can get it by net on social media. You can choose the very best book for you, science, comedian, novel, or whatever by means of searching from it. It is named of book Ocean Biogeochemical Dynamics. You'll be able to your knowledge by it. Without causing the printed book, it could add your knowledge and make a person happier to read. It is most important that, you must aware about guide. It can bring you from one destination to other place.

Ladonna Warren:

Reading a publication make you to get more knowledge from the jawhorse. You can take knowledge and information coming from a book. Book is prepared or printed or outlined from each source that will filled update of news. In this particular modern era like now, many ways to get information are available for a person. From media social such as newspaper, magazines, science publication, encyclopedia, reference book, novel and comic. You can add your knowledge by that book. Are you ready to spend your spare time to spread out your book? Or just seeking the Ocean Biogeochemical Dynamics when you essential it?
