The Global Capitalist Crisis and Its Aftermath: The Causes and Consequences of the Great Recession of 2008-2009 (Globalization, Crises, and Change) Berch Berberoglu

Written by a team of experts on the contemporary global capitalist political economy who are able to shed light on the inner workings of global capitalism and the capitalist globalization process that has led to the growth and development of capitalism from the national to the global level, this groundbreaking volume provides critical analyses of the causes and consequences of the Great Recession of 2008-2009. Through a careful examination of the origin, development and aftermath of the catastrophic economic crisis from which the world is still trying to recover, editor Berch Berberoglu and his colleagues demonstrate that those most responsible for the economic collapse are the ones least affected by its devastating impact felt most severely by working people around the world. Ultimately, this book argues that it is only through the systematic restructuring of the world economy by the working class that society will be able to prevent the boom and bust cycle of global capitalist crises and usher in a more egalitarian socialist economy and society.
