Artificial Intelligence Methods In Software Testing (Series in Machine Perception & Artificial Intelligence ; Vol. 56) Mark Last, Abraham Kandel, Horst Bunke

An inadequate infrastructure for software testing is causing major losses to the world economy. The characteristics of software quality problems are quite similar to other tasks successfully tackled by artificial intelligence techniques. The aims of this book are to present state-of-the-art applications of artificial intelligence and data mining methods to quality assurance of complex software systems, and to encourage further research in this important and challenging area.

From reader reviews:

Robert Reynolds:

Hey guys, do you really want to find a new book to learn? Maybe the book with the subject Artificial Intelligence Methods In Software Testing (Series in Machine Perception & Artificial Intelligence ; Vol. 56) suitable to you? The book was written by well known writer in this era. Typically the book titled Artificial Intelligence Methods In Software Testing (Series in Machine Perception & Artificial Intelligence ; Vol. 56) is one of several books that will everyone read now. This kind of book was inspired lots of people in the world. When you read this reserve you will enter the new dimension that you ever know previous to. The author explained their concept in the simple way, thus all of people can easily be aware of the core of this reserve. This book will give you a wide range of information about this world now. So that you can see the represented of the world within this book.

Corinne Parsons:

The particular book Artificial Intelligence Methods In Software Testing (Series in Machine Perception & Artificial Intelligence ; Vol. 56) has a lot details on it. So when you check out this book you can get a lot of advantage. The book was published by the very famous author. Tom makes some research before write this book. That book very easy to read you may get the point easily after looking over this book.

Larry Morris:

In this period of time globalization it is important to someone to obtain information. The information will make someone to understand the condition of the world. The health of the world makes the information easier to share. You can find a lot of references to get information example: internet, magazine, book, and soon. You will observe that now, a lot of publisher this print many kinds of book. The actual book that recommended to your account is Artificial Intelligence Methods In Software Testing (Series in Machine Perception & Artificial Intelligence ; Vol. 56) this guide consist a lot of the information on the condition of this world now. This specific book was represented so why is the world has grown up. The terminology styles that writer require to explain it is easy to understand. The actual writer made some exploration when he makes this book. Honestly, that is why this book ideal all of you.

Carolyn Rodriguez:

What is your hobby? Have you heard this question when you got learners? We believe that that issue was given by teacher to their students. Many kinds of hobby, Everybody has different hobby. And you know that little person just like reading or as studying become their hobby. You have to know that reading is very important and book as to be the thing. Book is important thing to increase you knowledge, except your teacher or lecturer. You get good news or update in relation to something by book. Many kinds of books that can you choose to adopt be your object. One of them are these claims Artificial Intelligence Methods In Software Testing (Series in Machine Perception & Artificial Intelligence ; Vol. 56).
