Handbook on Semidefinite, Conic and Polynomial Optimization (International Series in Operations Research & Management Science)

Handbook on Semidefinite, Conic and Polynomial Optimization (International Series in Operations Research & Management Science)

Semidefinite and conic optimization is a major and thriving research area within the optimization community. Although semidefinite optimization has been studied (under different names) since at least the 1940s, its importance grew immensely during the 1990s after polynomial-time interior-point methods for linear optimization were extended to solve semidefinite optimization problems.

Since the beginning of the 21st century, not only has research into semidefinite and conic optimization continued unabated, but also a fruitful interaction has developed with algebraic geometry through the close connections between semidefinite matrices and polynomial optimization. This has brought about important new results and led to an even higher level of research activity.

This *Handbook on Semidefinite, Conic and Polynomial Optimization* provides the reader with a snapshot of the state-of-the-art in the growing and mutually enriching areas of semidefinite optimization, conic optimization, and polynomial optimization. It contains a compendium of the recent research activity that has taken place in these thrilling areas, and will appeal to doctoral students, young graduates, and experienced researchers alike.

The Handbook's thirty-one chapters are organized into four parts:

- *Theory*, covering significant theoretical developments as well as the interactions between conic optimization and polynomial optimization;
- *Algorithms*, documenting the directions of current algorithmic development;
- *Software*, providing an overview of the state-of-the-art;
- *Applications*, dealing with the application areas where semidefinite and conic optimization has made a significant impact in recent years.

From reader reviews:

Sybil Davis:

This Handbook on Semidefinite, Conic and Polynomial Optimization (International Series in Operations Research & Management Science) book is just not ordinary book, you have after that it the world is in your hands. The benefit you get by reading this book will be information inside this e-book incredible fresh, you will get data which is getting deeper anyone read a lot of information you will get. That Handbook on Semidefinite, Conic and Polynomial Optimization (International Series in Operations Research & Management Science) without we know teach the one who studying it become critical in thinking and analyzing. Don't become worry Handbook on Semidefinite, Conic and Polynomial Optimization (International Series in Operations Research & Management Science) can bring whenever you are and not make your case space or bookshelves' grow to be full because you can have it within your lovely laptop even cellphone. This Handbook on Semidefinite, Conic and Polynomial Optimization (International Series in Operations Research & Management Science) having great arrangement in word and layout, so you will not feel uninterested in reading.

Georgia Lopez:

The particular book Handbook on Semidefinite, Conic and Polynomial Optimization (International Series in Operations Research & Management Science) will bring you to the new experience of reading some sort of book. The author style to describe the idea is very unique. In case you try to find new book to read, this book very acceptable to you. The book Handbook on Semidefinite, Conic and Polynomial Optimization (International Series in Operations Research & Management Science) is much recommended to you to learn. You can also get the e-book from the official web site, so you can quickly to read the book.

April Wages:

Do you really one of the book lovers? If so, do you ever feeling doubt if you find yourself in the book store? Aim to pick one book that you find out the inside because don't judge book by its cover may doesn't work here is difficult job because you are scared that the inside maybe not while fantastic as in the outside look likes. Maybe you answer could be Handbook on Semidefinite, Conic and Polynomial Optimization (International Series in Operations Research & Management Science) why because the great cover that make you consider with regards to the content will not disappoint you. The inside or content is fantastic as the outside or maybe cover. Your reading sixth sense will directly assist you to pick up this book.

Mary Adams:

In this era which is the greater man or woman or who has ability in doing something more are more precious than other. Do you want to become among it? It is just simple method to have that. What you should do is just spending your time little but quite enough to enjoy a look at some books. One of many books in the top collection in your reading list is Handbook on Semidefinite, Conic and Polynomial Optimization

(International Series in Operations Research & Management Science). This book and that is qualified as The Hungry Inclines can get you closer in turning out to be precious person. By looking way up and review this reserve you can get many advantages.
