Geschiedenis in het groot: Een alomvattende visie (Dutch Edition) Fred Spier

The social and natural sciences have more in common than most of us may suspect. This thought-provoking study presents a single straightforward structure which unites the latest scientific views on the history of the universe, the solar system, the planet, life and humankind. The focus on the formation, differentiation and transformation of configurations, regimes, and on the ever-changing reactions and interactions between them produces a simple, dynamic and reality-congruent structure with which to view the whole of history. It contributes to a better understanding of some long-standing academic controversies such as the root causes behind the origins of humankind, the rise of agriculture and the emergence of early states. This is the Dutch edition. The book is also available in English as
