A.I. Apocalypse (Singularity Series Book 2) William Hertling

Leon Tsarev is a high school student set on getting into a great college program, until his uncle, a member of the Russian mob, coerces him into developing a new computer virus for the mob's botnet - the slave army of computers they used to commit digital crimes.

The evolutionary virus Leon creates, based on biological principles, is successful -- too successful. All the world's computers are infected. Everything from cars to payment systems and, of course, computers and smart phones stop functioning, and with them go essential functions including emergency services, transportation, and the food supply. Billions may die.

But evolution never stops. The virus continues to evolve, developing intelligence, communication, and finally an entire civilization.

Some may be friendly to humans, but others are not.

Leon and his companions must race against time and the military to find a way to either befriend or eliminate the virus race and restore the world's computer infrastructure.

Praise for the Singularity Series:

“Highly entertaining, gripping, thought inspiring. Don't start without the time to finish — it won't let you go.”

—Gifford Pinchot III, founder Bainbridge Graduate Institute, author **THE INTELLIGENT ORGANIZATION**

“A tremendous book that every single person needs to read. In the vein of Daniel Suarez's *Daemon* and *Freedom(TM)*, William's book shows that science fiction is becoming science fact. Avogadro Corp describes issues, in solid technical detail, that we are dealing with today that will impact us by 2015, if not sooner. Not enough people have read these books. It's a problem for them, but not for the [emergent] machines.”

—Brad Feld, managing director Foundry Group, cofounder TechStars

“A fascinating look at how simple and benign advancements in technology could lead to the surprise arrival of the first AI. And like all good techno-thrillers, the reality of AI is less than ideal.”

—Jason Glaspey, **SILICON FLORIST**

“An alarming and jaw-dropping tale about how something as innocuous as email can subvert an entire organization. I found myself reading with a sense of awe, and read it way too late into the night.”

—Gene Kim, author of **VISIBLE OPS**
