Fixed Income Securities Valuation, Risk, and Risk Management Veronesi

This book provides a thorough discussion of these complex securities, the forces affecting their prices, their risks, and of the appropriate risk management practices. Fixed income securities, however, provides a methodology, and not a "shopping list" of all the possible interest rate securities ever been invented. It provides instead examples and methodologies that can be applied quite universally, once the basic concepts have been understood. Part i: basics. · an introduction to fixed income markets. · basics of fixed income securities. · basics of interest rate risk management. · basic refinements in interest rate risk management. · interest rate derivatives: forwards and swaps. · interest rate derivatives: futures and options. · inflation, monetary policy, and the federal funds rate. · basics of residential mortgage backed securities. Part ii: term structure models: trees. · one step binomial trees. · multi-step binomial trees. · risk neutral trees and derivative pricing. · american options. · monte carlo simulations on trees. Part iii: term structure models: continuous time. · interest rate models in continuous time. · no arbitrage and the pricing of interest rate securities. · dynamic hedging and relative value trades. · risk neutral pricing and monte carlo simulations. · the risk and return of interest rate securities. · no arbitrage models and standard derivatives. · the market model for standard derivatives. · forward risk neutral pricing and the libor market model. · multifactor models.
