WirelessMAN: Inside the IEEE 802.16 Standard for Wireless Metropolitan Area Networks Carl Eklund, Roger B. Marks, Subbu Ponnuswamy, Kenneth L. Stanwood, Nico J.M. Van Waes

WirelessMAN: Inside the IEEE 802.16 Standard for Wireless Metropolitan Area Networks is the perfect resource for understanding and navigating through the IEEE 802.16 standard, which serves as the basis of all WiMAX broadband wireless access systems. Written by the 802.16 Working Group's Chair, Dr. Roger B. Marks, and Vice Chair, Kenneth L. Stanwood, along with Working Group participants Carl Eklund, Subbu Ponnuswamy, and Dr. Nico J.M. van Waes, the book provides a thorough understanding of the standard from an insider's perspective not found elsewhere. Inside:

- Find detailed descriptions of the medium access control (MAC) and physical layer (PHY) operation up through IEEE 802.16-2004, with an introduction to the technologies introduced in IEEE 802.16e.
- See why certain design choices were made and how recent technological developments, real-world experience, and lessons learned from previous projects were used to make critical tradeoffs.
- Get details on OFDM, OFDMA, multiple antenna systems, security, and mesh technologies.
- See performance simulations and learn about current conformance and interoperability activities.
- Read a summary of ongoing projects, related standards, and future extensions.

WirelessMAN is a must-read for anyone wishing to understand the IEEE 802.16 standard and its operation. This book will immediately benefit designers, engineers, students, and deployment professionals who need to rapidly understand the fundamentals of the standard. The book is a self-contained companion to the standard, and no specific knowledge of any other wireless protocols is assumed. It can be used for self-study, as a reference, or as a designer's handbook.

From reader reviews:

Dean Rakestraw:

Do you have favorite book? Should you have, what is your favorite's book? Guide is very important thing for us to know everything in the world. Each reserve has different aim or goal; it means that e-book has different type. Some people experience enjoy to spend their the perfect time to read a book. These are reading whatever they take because their hobby is usually reading a book. What about the person who don't like looking at a book? Sometime, man or woman feel need book if they found difficult problem or exercise. Well, probably you'll have this WirelessMAN: Inside the IEEE 802.16 Standard for Wireless Metropolitan Area Networks.

Arthur Freeman:

In this 21st one hundred year, people become competitive in most way. By being competitive at this point, people have do something to make these individuals survives, being in the middle of the particular crowded place and notice through surrounding. One thing that at times many people have underestimated this for a while is reading. That's why, by reading a guide your ability to survive improve then having chance to stand up than other is high. To suit your needs who want to start reading the book, we give you this specific WirelessMAN: Inside the IEEE 802.16 Standard for Wireless Metropolitan Area Networks book as nice and daily reading e-book. Why, because this book is greater than just a book.

Patti Wooden:

What is your hobby? Have you heard that question when you got pupils? We believe that that query was given by teacher with their students. Many kinds of hobby, Everyone has different hobby. And you know that little person such as reading or as looking at become their hobby. You have to know that reading is very important as well as book as to be the matter. Book is important thing to include you knowledge, except your teacher or lecturer. You find good news or update with regards to something by book. Amount types of books that can you decide to try be your object. One of them is niagra WirelessMAN: Inside the IEEE 802.16 Standard for Wireless Metropolitan Area Networks.

Mildred Kershner:

Reading a reserve make you to get more knowledge as a result. You can take knowledge and information from a book. Book is prepared or printed or created from each source in which filled update of news. In this particular modern era like now, many ways to get information are available for you. From media social just like newspaper, magazines, science guide, encyclopedia, reference book, book and comic. You can add your understanding by that book. Isn't it time to spend your spare time to spread out your book? Or just trying to find the WirelessMAN: Inside the IEEE 802.16 Standard for Wireless Metropolitan Area Networks when you required it?
