Fireworks Algorithm: A Novel Swarm Intelligence Optimization Method Ying Tan

This book is devoted to the state-of-the-art in all aspects of fireworks algorithm (FWA), with particular emphasis on the efficient improved versions of FWA. It describes the most substantial theoretical analysis including basic principle and implementation of FWA and modeling and theoretical analysis of FWA. It covers exhaustively the key recent significant research into the improvements of FWA so far. In addition, the book describes a few advanced topics in the research of FWA, including multi-objective optimization (MOO), discrete FWA (DFWA) for combinatorial optimization, and GPU-based FWA for parallel implementation. In sequels, several successful applications of FWA on non-negative matrix factorization (NMF), text clustering, pattern recognition, and seismic inversion problem, and swarm robotics, are illustrated in details, which might shed new light on more real-world applications in future. Addressing a multidisciplinary topic, it will appeal to researchers and professionals in the areas of metaheuristics, swarm intelligence, evolutionary computation, complex optimization solving, etc.

From reader reviews:

Alexander Ratcliff:

Do you have favorite book? When you have, what is your favorite's book? Guide is very important thing for us to know everything in the world. Each publication has different aim as well as goal; it means that guide has different type. Some people truly feel enjoy to spend their the perfect time to read a book. They can be reading whatever they acquire because their hobby is definitely reading a book. Why not the person who don't like looking at a book? Sometime, person feel need book after they found difficult problem or exercise. Well, probably you should have this Fireworks Algorithm: A Novel Swarm Intelligence Optimization Method.

Ruth Snider:

The book Fireworks Algorithm: A Novel Swarm Intelligence Optimization Method gives you the sense of being enjoy for your spare time. You can utilize to make your capable much more increase. Book can to get your best friend when you getting stress or having big problem along with your subject. If you can make examining a book Fireworks Algorithm: A Novel Swarm Intelligence Optimization Method to get your habit, you can get far more advantages, like add your capable, increase your knowledge about a number of or all subjects. You are able to know everything if you like available and read a e-book Fireworks Algorithm: A Novel Swarm Intelligence Optimization Method. Kinds of book are a lot of. It means that, science reserve or encyclopedia or other individuals. So , how do you think about this publication?

Patsy Locke:

What do you regarding book? It is not important along? Or just adding material if you want something to explain what the ones you have problem? How about your time? Or are you busy person? If you don't have spare time to try and do others business, it is give you a sense of feeling bored faster. And you have free time? What did you do? Every individual has many questions above. They need to answer that question since just their can do which. It said that about guide. Book is familiar on every person. Yes, it is right. Because start from on kindergarten until university need this specific Fireworks Algorithm: A Novel Swarm Intelligence Optimization Method to read.

Ann Cason:

Reading a book tends to be new life style within this era globalization. With looking at you can get a lot of information that could give you benefit in your life. Using book everyone in this world can share their idea. Textbooks can also inspire a lot of people. A lot of author can inspire their particular reader with their story as well as their experience. Not only the storyline that share in the textbooks. But also they write about the information about something that you need example of this. How to get the good score toefl, or how to teach your children, there are many kinds of book which exist now. The authors on earth always try to improve their expertise in writing, they also doing some exploration before they write on their book. One of them is
