Exploring Psychology David G. Myers

Exploring psychology has retained its popular system of study aids, integrated into an SQ3R structure that augments the narrative without disrupting it. Each chapter opens with a chapter outline that enables students to quickly survey its major topics. Numbered preview questions at the start of each new major topic define the learning objectives that will guide students as they read. Rehearse It quizzes at the end of each major section will stimulate students to rehearse what they have learned. These test items offer a novel combination of crisp review of key ideas, and practice with the multiple-choice test format. All key terms are defined in the margins for ready reference while students are being introduced to the new term in the narrative . Periodic Thinking Critically About and Close-up boxes encourage development of critical thinking skills as well as application of the new concepts. The chapter-ending Review is structured as a set of answers to the numbered preview questions. Test Yourself questions at the end of each chapter offer students an opportunity to review and apply key concepts for even better retention. The Tips for Studying Psychology section at the end of Chapter 1 explains the SQ3R-based system of study aids, suggesting how students can survey, question, read, rehearse, and review the material for maximum retention.
