- Backing Up Your PCs to Lion Server
- Access Lion Server Anywhere With VPN
- Create and Host Websites, Blogs and Wikis

Reader Reviews for Using OS X Lion Server in the Home

Thanks for doing this series -- very timely for me as I am just getting ready to download Lion Server and do

a similar setup myself. I was searching to see how people used a Lion server for their home networks and to look for any guidance, so glad I found this series.

Just discovered this article series today. I've read a couple of the sections and it looks good.

I must say it hit me as like a breath of fresh air to me the moment I saw the Mac headline on WGS, a site that I associate with Windows, and Home Server. And after what happened and the lack of any positive news our of the field for a while, I have no doubt this Mac Server series is going to be very interesting.

This series is an excellent resource.

This is great so far - thanks! I am not an IT pro, but the family has all their photos, music, video etc fragmented on individual macs, all laptops, (and 1 PC). I am seriously considering buying a mini server to consolidate and share these files. I cant wait to read the upcoming segments! Thanks again.

Great article! Keep up the good work...I can't wait for the next part of the series. I'm thinking of ditching WHS and WMC all together and building a hackintosh lion server and a hackintosh plex media center.

I have to admit, this is a great article! I have a friend/client wanting to network his house and he's a ALL MAC household and cringed when I said windows server, so if this works out, I'm on it! I am in the process of installing this on my hackintosh.

Just a question, but when will the next part be coming out? I am very excited - I love the series and I am seriously considering a mac mini server. Just wanted to see how to configure it.

Great series of articles ! Thank you.

Great articles. Looking forward for the rest of it.

I am very new to home networking and have found these articles of great help.
